“How Can Automation Vendors Quickly and Easily Adopt The Biggest Little Opportunity In Industrial Automation?”

Real Time Automation Joins The AS-Interface Bus Alliance

AS-I Networking is now one of the fastest growing industrial networking technologies in the US. Both the number of vendors supporting AS-I and the number of units shipped are growing every month. To meet the needs of the increasing number of automation vendors requiring AS-I networking Real Time Automation is now a part of the AS-Interface Alliance.

Milwaukee, WI (PRWEB) March 27, 2006 – AS-Interface Bus, the Biggest Little Opportunity in Industrial Automation Today just became easier to implement. Real Time Automation, the top industrial network provider in industrial automation is now supporting the AS-Interface.

“I am very excited about AS-I bus and our entry into the fast growing AS-I Market. The sheer simplicity, low cost per IO point and incredible speed offered by AS-I are very attractive to automation vendors. We are looking forward to creating AS-I PCBs and other AS-I solutions for our customers.”

- John Rinaldi, President, Real Time Automation

AS-Interface is a perfect solution for automation systems in Automotive, Discrete Manufacturing, Plastics, Flow Control and many other industries. In fact AS-Interface is a good selection for any control system that can benefit from simplicity of operation, low cost I/O points, high speed response, reduced cable costs and increased diagnostics. With over 10 Million installed nodes AS-I is the leading sensor/actuator network.

Automation vendors can now get from Real Time Automation the same fast, risk free development assistance for AS-I that is available for DeviceNet (www.rtaautomation.com/devicenet), EtherNet/IP (www.rtaautomation.com/ethernetip), PROFINet (www.rtaautomation.com/profinetio), Modbus TCP (www.rtaautomation.com/modbustcp) and other industrial automation protocols. Automation vendors that need custom integration of the AS-Interface into their controllers, custom AS-I PCBs, standalone AS-I gateways and other AS-Interface solutions can find high quality, fast delivery solutions from Real Time Automation.

“Our first experience using RTA has been a resounding success. The development proceeded smoothly and the delivered product meets all specifications. RTA kept us well informed throughout the course of the project, applying good project tracking and development/testing status reporting tools. If an unexpected issue arose, they solved it quickly or advised us accurately as to when to expect a solution. RTA also provided training to our in-house maintenance department and to our customer support center as the development completed.

Overall, a great team to work with!”
